

TABLE OF CONTENTS

Bazhenov V.A., Sacharov A.S., Guliar O.I., Pyskunov S.O., Maksymiuk Yu.V.
 Features application circuit moment finite element (MSSE) for nonlinear calculations of plates and shells. 3

Lizunov P.P., Gulyar O.I., Solodei I.I.
 Universal algorithm of nonlinear process numerical modelling of reinforced construction deformation 17

Solovei N.A., Krivenko O.P., Mishchenko O.A.
 Determination of efficient physico-mechanic characteristics of reinforced with unidirectional fibers composite material. 30

Bazhenov V.A., Gulyar O.I., Pyskunov S.O.
 An estimation of residual lifetime of spatial structural elements under continual fracture condition 50

Bazhenov V.A., Pogorelova O.S., Postnikova T.G.
 Influence of system stiffness parameters at contact softness in vibroimpact system 62

Ivanchenko G.M.
 The wave interaction of heavy breaks in the water with elastic barrier. . . 75

Bazhenov V.A., Pogorelova O.S., Postnikova T.G.
 Comparison of vibroimpact system dynamic behaviour in dependence from contact kind between its elements. 83

Gaidaichuk V.V., Shevchuk L.V.
 Non-holonomic dynamics of whirling vibrations of deep drill columns. 92

Vorona Y.V., Lukianchenko O.O., Kostina O.V.
 Stochastic parametric vibrations of elastic systems with regard to their previous states. 102

Bezverkhyi O.I., Levchenko V.V., Makievskiy O.I.
 Harmonic vibrations of piezoceramic ring plate with an azimuthally cut of electrodes. 114

Bazhenov V.A., Solovei N.A., Krivenko O.P.

Modeling of nonlinear deformation and buckling of elastic
inhomogeneous shells 121

Maksymiuk Yu.V.

Algorithms for solving problems of nonlinear deformation and stability
of elastoplastic axisymmetrical average thickness shells. 148

Ban'ko S.N., Kobelsky S.V., Kharchenko V.V.

Numerical simulation of the stress state of a hollow cylinder with a
defect in the form of a cavity with a crack. 157
